

“ My wife is a heavy smoker and within a few days, the smoke odors were essentially gone. We are even sleeping better at night. We attribute that to the reduced amount of airborne particles which aggravate our sinuses and create allergy problems.

- Stephen Y., Kearny, NJ

“ We would highly recommend this system to everybody. My allergies are almost non-existent and our beautiful new home always smells fresh, even after cooking fish or garlic.

- Jack R, Blue Springs, MO

## HVAC Air Purification Devices

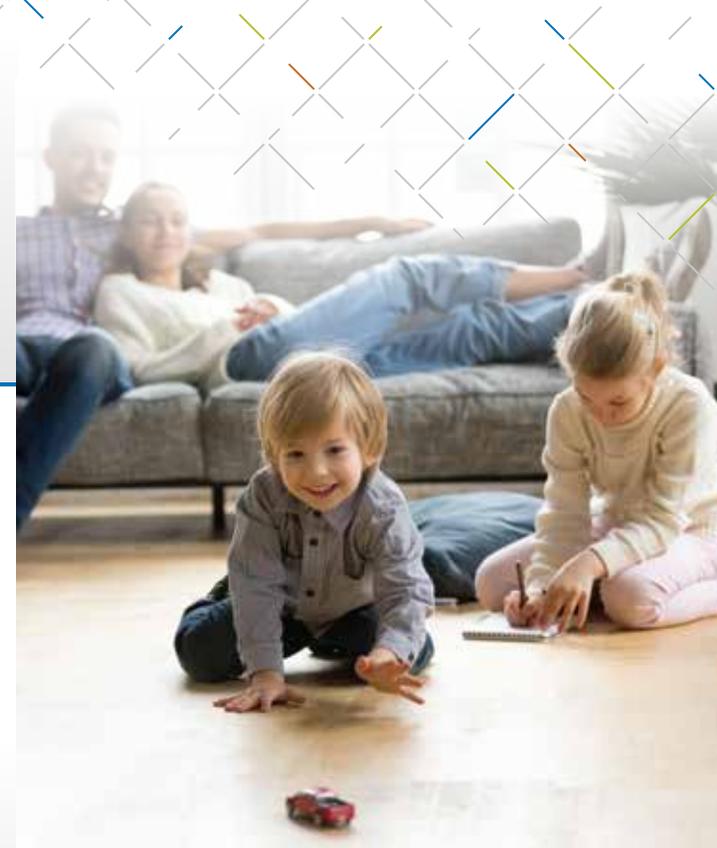

Invisible | Silent | Filterless

PlasmaPure's HVAC devices fit seamlessly into your home's existing HVAC system for continuous whole-home air purification. From small to large residences, we have a solution to fit your needs.

# PlasmaPURE

## Whole Home Air Purification

Plasma Air is a global leader in air purification solutions for

schools, healthcare facilities, offices, single and multi-family residences, and dozens of commercial and industrial applications.

## Portable Air Purification Units

Easy-to-Use | Powerful | Filterless

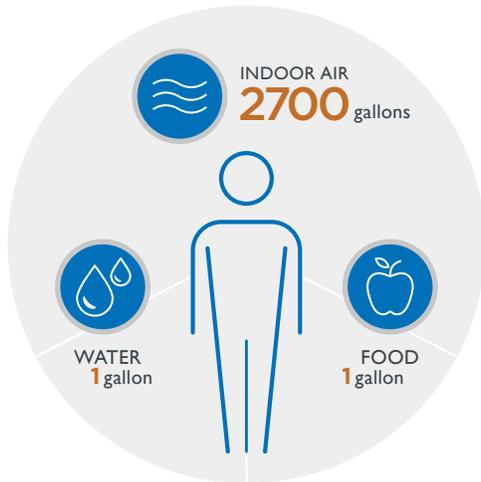

Plasma Air offers a variety of portable units, ideal for use as a point-of-need supplement to a whole-home HVAC air purification solution.

Fill Your Home with Pure, Clean Air

## Why Purify Indoor Air?

Humans spend up to 90% of their time inside buildings, inhaling thousands of gallons of indoor air every day.

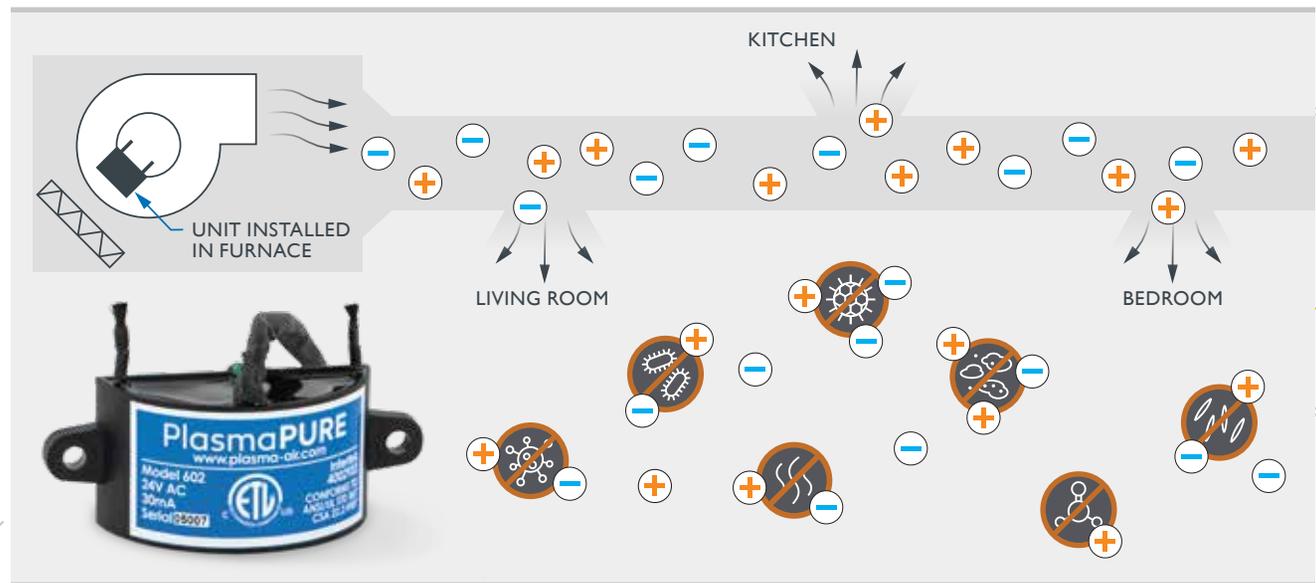

The air inside the typical home is filled with invisible yet harmful pollutants such as bacteria, viruses, mold spores, VOCs, dust, pet dander and pollen. These pollutants can trigger asthma, allergies, headaches, infections, headaches, and respiratory conditions.

## How PlasmaPURE Works

PlasmaPURE replicates nature's process for cleaning the air by producing positive and negatively charged ions that interact with and neutralize pollutants in the air. The PlasmaPURE device fits seamlessly into your home's existing HVAC system for continuous whole-home air purification. Once installed our devices are silent, invisible, and worry-free — requiring little to no maintenance.

## Safe Haven For Your Family

PlasmaPURE technology is free of harmful byproducts and safe for continuous use around your family and pets to neutralize odors, VOCs, bacteria, and viruses, and reduce airborne particulate like smoke, mold spores, dust, pet dander, and pollen.

## Mountain Air Quality in Your Home

PlasmaPURE is always working inside your HVAC system to silently, invisibly and safely neutralize airborne pollutants.
